NUMBER 23.

BRANCH A. C. HAS HARD LUCK

Series of Mishaps Turns What
Should Have Been Easy 1st
Into Second Place.

PAYSON HIGH TAKES
FIRST ON 25 POINTS

Bowen Spiked in 440, Shurtz Kicks
Over Hurdle, and Conflict in
Events Shuts Out Bunker.

Owing to hard luck all along the line, the B. A. C. track and field team, which under average conditions should have captured the state tourney with many points to spare, took only second place, the first honors going to the Payson high school.

To begin with, Junior McConnell, who is regarded as one of the best all around high school athletes in the state, and who had a cinch on three or more firsts, "knocked down three hurdles in his class work," as one Salt Lake paper put it, and was voted ineligible by the faculty. This was misfortune No. 1.

In the next place, Bowen, who would undoubtedly have taken first in the 220 and 440 dashes, was spiked badly at the first turn of the 440, and while he made a very plucky run and finished second in this event, notwithstanding his heel was badly lacerated and his shoe off, was nevertheless out of the running for first places. This was misfortune No. 2.

For misfortune No. 3, there was a conflict between the time for the pole vault and the discus throw, and also the elimination of the hammer throw, in both of which Bunker was certain of making points, had he been given an opportunity to enter.

As the last misfortune, and the "straw which broke the camel's back," Shurtz, who had a good prospect for capturing first in the hurdles, kicked over his last hurdle, something he had not done in practice during the entire season. This settled it, so far as first place was concerned, and the B. A. C. emerged from the tournament with 18 points to its credit as against 25 for the Payson high school. While it was a sore disappointment to the boys as well as Coach Christensen, who has worked hard for the success of his team, they know how to take defeat, especially when it is more than half a victory, and are not sulking in their tents, but are back to their school work as usual.

(From the Salt Lake Tribune.)

The 1916 Utah High School Athletic association's track and field meet resulted in a victory for the Payson high school of Utah county by a score of 25 to Branch Agricultural college's 18. The other schools follow: East high, 13; Murdock, 11; West high, 9; North Sanpete, 8; Ogden, 6; Springville, 5; American Fork, 3; Pleasant Grove, 3; Nephi, 3; L. D. S. U., 2; B. Y. C., 2.

The surprise was the defeat of the Branch Agricultural college boys, who were strong favorites before the meet. The Payson aggregation won the meet solely on track events, capturing firsts in the 100, 220, 440, relay and hurdles.

B. A. C. had an unusual run of ill fortune. First, the star sprinter, Bowen, in the 440, was spiked and lost an apparently certain first as a result of the accident. This kept him out of the 220 and slowed him up for the relay. Bunker was expected to annex points in the discus throw, but was participating in the pole vault and could not engage in both events.

New Discus Record.

With the exception of the discus throw, in which Walt Hansen of the B. A. C. threw the oval 108 feet 8 inches, there were no new state records. Kay of Ogden held the discus throw mark, with 101 feet prior to Hansen's heave.

Macbeth of Payson, with firsts in the 100 and 220, and George of Murdock, with firsts in the broad and high jumps, were the big individual point winners. Neilson of North Sanpete made eight.

Leonard Bowen, the B. A. C. star sprinter, staged a wonderful exhibition in the 440, when, after being spiked on the first turn and losing his shoe, he finished the race and led up to the last ten yards, but was beaten out. He showed great nerve and without a doubt would have pushed the state record close had he not been under such a handicap. The crowd gave the plucky athlete a big hand when the fact became known. He wanted to run in the 220 but his injury could not be dressed in time. However, he was in the relay.

100 Yard Dash Is Close.

The 100-yard dash was won by Macbeth of Payson in a fairly close finish, with Hibbs of Ogden second and Barnes, East high, third. The event was close and many thought Hibbs had won. Bowen, the B. A. C. crack, got a poor start and lost 2.5 seconds. The Payson boy again showed his class in the 220, after having taken things easy in the preliminary heats.

He had a safe margin at the tape, with Hibbs and Barnes again second and third, respectively. The time was :23 2-5.

In the 440 the gameness of Bowen of the B. A. C. was demonstrated when he ran the race under a big handicap and yet finished second. He led to the last ten yards, but was too weak to keep the lead. Oberhansley of Payson was the winner, with Watts of the L. D. S. U. third. The time was :54 3-5.

Half Mile a Thriller.

What was regarded as one of the most beautiful exhibitions of the day occurred in the half mile, when Adam Seemiller, B. A. C., led throughout and had no difficulty in winning. He showed great form and was as fresh at the finish as at the start. Of the entire B. A. C. team he made as good a showing as any. McCune of Nephi and Watts of the L. D. S. U. finished in second and third positions.

Gordon Wick, the East high runner, surprised 'em all when he duplicated his feat of beating out Warden of the West high. It was said in the division meet that Wick's victory was a fluke and he couldn't do it again in a lifetime, but he showed them yesterday and proved his worth. His time was :53, exceptionally fast time. Warden finished second and Funk, also of the West high, third.

New Hurdle Champ.

The hurdles saw the 1915 winner—Shurtz—beaten by Mills of Payson by a few inches. The finish was exceptionally close and had it not been for Shurtz's knocking down the last hurdle he might have won. Shurtz said after the race that it was the first hurdle he had kicked over this season. Jarvis won over Thorley of the B. A. C. for third place by another close finish.

In the relay the East high led up to the final ten yards, but Barnes didn't have sufficient strength to keep up the pace and Payson won by a few yards margin. B. A. C. was third.

George of Murdock was first in the high jump with a leap of 5 feet 8 inches. Walker of Pleasant Grove was second and Kesler of Murdock third.

George took another first in the broad jump with 20 feet 5 inches. Wins of American Fork and Johnson of the West high won second and third. Johnson and Kesler of Murdock were tied for third, but in the final jump Johnson won out.

The Weight Events.

Nelson in the shot put upset all predictions when he heaved the shot 42 feet 5 inches, which was too much for the remainder of the field. Johnson of the West high and Hansen of B. A. C. finished second and third, both getting marks better than 40 feet.

Hansen of the B. A. C. beat out Brown of the East high in the discus throw by eight inches. Both heaved the oval in good form and had the other contestants completely outclassed.

Weight of Springville, with a vault of 11 feet 2 inches, won first in the pole vault. Others to place were Neilson of North Sanpete and Bunker of the B. A. C.

For the Good of All.

J. W. Paxman returned from the Kanab country yesterday and last night met with some of the land owners at the library auditorium in the interests of his colonization project, which he states is meeting with considerable favor on the part of local people, but would proceed much more rapidly if some more of the holders of large tracts of land in the valley would list up more of their property.

It is certainly a movement in the interests of the whole people, and owners of large tracts should give over a portion of their holdings at a reasonable figure for the sake of the benefit it will be to the people of the valley at large, and also with a view to the effect it will have of increasing the value of their other holdings which it would undoubtedly do.

Another meeting to consider the question has been called for next Thursday night.

Commencement Week.

The program for Commencement Week at the B. A. C. briefly outlined, is as follows:

Friday night, May 26, Juniors' program.

Saturday morning, teachers' reception to graduates.

Saturday night, Seniors' program.

Sunday night, baccalaureate sermon.

Monday, 10 a. m., graduation exercises.

Monday afternoon, Alumni business meeting and banquet.

Monday evening, Alumni ball.

Presbyterian Mission Services.

The regular services will be held next Sunday.

The subject of the evening sermon will be, "A Manly Fear."

We invite you to attend.

CLATON S. RICE, Minister.

J. F. O'Neill, the discoverer of the potash deposits of this county, and who was reported last week to have gone to New York City in the interests of his properties, did not get farther than Salt Lake City, where he got in touch with practically the same interests he was going to seek in New York, and is now negotiating with them for a sale of his holdings. He is at present in the hills for the purpose of obtaining more extensive and reliable samples from the ledges, and upon the returns from these samples will depend largely the future of the potash deposits.

\$8,000 GARAGE FOR CEDAR CITY

G. R. Parry & A. T. Jones Make
Sensational Announcement
of New Business.

INVESTMENT TO BE
BY DAVID BULLOCH

Architect Jones Now Working on the
Plans and Specifications for
Up-to-Date Plant.

The announcement has just been made by Messrs. G. R. Parry and A. T. Jones of the erection of the present season of another large garage in Cedar City, which is to cost approximately \$8,000, and will be an ornament to Main street. The new establishment is to be erected for Messrs. Parry & Jones by David Bulloch, on his ground just across the alley from the old Palmer residence on the west side of Main street, and will front on both thoroughfares. It is to have a plate glass front, heating plant, and all modern conveniences, providing garage for about 20 cars, besides the display and work rooms, which will accommodate a number more cars.

Architect Jones has the contract for the plans and specifications, and is already at work upon them. It is the purpose to push the construction right along as rapidly as possible.

The promoters and lessees of the garage announce their intention of carrying a full line of tires, accessories, gasoline, oils and grease, and to conduct a strictly up-to-date garage, where car owners can obtain the very most efficient service. They also state that as soon as the garage is ready they will handle all their cars for which they have the agency in co-partnership.

Mr. Bulloch, who is furnishing the investment for the undertaking, is one of the first pioneers of Cedar City. He was the first white boy, he states, upon the present site of the town, and is anxious to do his part towards the building up of the place. He has the ground and the money, and is willing to combine them in a state of productivity for a very reasonable return upon his investment.

With two garages already operating here, and with the announcement that Agent Fife, backed by the Ford company, will put up a \$5,000 garage and service station, it looks as if car owners in this part of the country would be well cared for.

A NIGHT IN HAWAII

The Hawaiian Troubadors, who present their striking musical novelty, "A Night in Hawaii," at the Ward Hall on Friday, May 19, have not misnamed their offering. The act was arranged with the object of presenting to the public a correct idea of the music, customs and dances of their native land. Every member of the company is a thorough musician, and their melodious voices blend perfectly with the soft tones of the string instruments in a sweet harmony so delightful to all music lovers.

Launa, rightfully recognized as Hawaii's daintiest dancer, takes no small part in the program, and the American and Hawaiian melodies, both vocal and instrumental, ranging from ragtime to grand opera and native dances in costume make up a program of pleasing variety.

Machinery for New Steam Laundry.

Mr. Gronway Parry informs us that the machinery for the new steam laundry is now on the way, and will be here very shortly. Everything will be strictly new and first class. There has been a little delay, Mr. Parry explains, due to investigations which he has been making of second-hand engines and boilers, but nothing was found that appealed to him, and now all new equipment will be used. Definite arrangements have not been made yet for a building, but Mr. Parry has two or three available quarters in sight, one of which will be decided upon by the time the machinery arrives, if the new building negotiated for fails to materialize.

To Work Grand Canyon Property.

M. M. Millett returned last Wednesday from the Grand Canyon, where he went in company with R. G. Page of Parowan to prospect further a copper property in the bottom of the gorge spring by Mr. Millett and A. W. Brouse. Millett brought back some samples of high grade copper, and states that it is his intention with Messrs. Brouse and Slaughter to work the property and commence shipping ore from it next September, after the hottest of the summer weather is over and the roads, or trails, are in a condition to travel. It will be necessary to carry the ore out of the canyon with burrows and mules.

Mr. Millett claims that the ore carries values of \$200 per ton in gold, silver and copper, and that they can get it carried out of the gorge for a cent and a half a pound.

GARAGE BUSINESS SHOWS REMARKABLE GROWTH.

Two years ago when J. A. Kopp quit a good job in a California garage to open a repair shop in Cedar City it was a serious question with him and some of his friends whether or not he was making a grave mistake. And during the first year it was more or less close picking, with not enough work to keep one man employed steadily. But during those early periods Mr. Kopp was making a reputation for his establishment, which it has since maintained, and the growth of his establishment has been quite phenomenal. The capacity of his garage has been increased three fold, and today it is employing anywhere from three to six workmen. Mr. Kopp came to Cedar just in the nick of time and got in on the ground floor in a good business, which is certain to grow and develop if his present and past policy is adhered to, of doing good work and charging fair prices.

In addition to Mr. Kopp's garage, Mr. Don Coppin has a garage in the lower part of town, which employs from one to two or three men, all of which goes to show the remarkable growth of the automobile industry in this part of the country.

BLADEN FOUND GUILTY AND GETS MODERATE FINE

Last Monday John M. Bladen, proprietor of the Palace Drug Store, was tried before Justice Palmer on the charge of selling intoxicating liquors illegally, his right to a jury trial being waived. The evidence was submitted and the arguments of counsel made, George R. Lund of St. George appearing for the defendant, and City Attorney C. G. Y. Higgins prosecuting. Justice Palmer took until Monday afternoon to arrive at a verdict, which was one of "guilty," and a fine of \$275.00 was imposed. The defendant through his counsel filed notice of an appeal.

Excursion Day Excursion on the Salt Lake Route.

Excursion tickets will be sold from all Salt Lake Route stations in Utah May 29 and 30. Also to points reached by the Utah Transportation company via Milford.

Tickets will be good return passage until May 31st. Adv.

Shall the Cow Be Given a Rest?

In all the large well handled dairy herds of America and among the good herdsmen the question of "Shall the cow be given a rest?" is never considered other than that she shall. The idea that we have had in the Western country that when a cow is dry she needs very little to eat is wrong and the sooner we get away from this condition of practice, the better off we will become and the greater production we will get from our dairy cows. To produce milk is just as much a tax on the system of the dairy cow as hard work is on the average draft horse, and for that reason it requires considerable energy and nutriment to keep up the body. It has been proved beyond question that cows when dry for a month to six weeks are much better producers than if milked up to within two weeks or a few days of their calving time. The only chance the herdman has to get ahead of the cow in feed is when she is not producing milk regularly. At this time there is a good opportunity to build up the body of the animal, and if she is anything like the right kind she immediately returns the stored up material in her milk as soon as she freshens. Cows that are milked right up to calving invariably will have a normal calf in every way, but the detriment comes to the mother rather than to the calf. The cow that is not given a rest before calving has a milk flow that is at a much lower level than the cow that is given a rest, and she never reaches the maximum production throughout the period that she otherwise would. She merely dwindles along giving half her usual amount of milk and never reaches the flow that she did in her other lactation periods.

Base Ball—Parowan vs. Cedar City.

The first local game of base ball of the season will be played next Saturday at 2:30 o'clock in the ball park. The Parowan boys are coming over determined to wipe out the defeat of two weeks ago, so a game worth while is assured.

Ten cents admission fee will be charged.

If the citizens of Cedar City want a base ball team, now is the time to boost.

The U. A. C. Summer School.

The Summer School of the State Agricultural College which begins at Logan on June 5 furnishes a week of lectures by Mr. J. A. Puffer, especially designed for vocational advisors, parents, teachers, and M. I. A. workers. It also offers a week of lectures by Professor Wm. McKeever, the well-known writer on child welfare which will be of especial interest to all Sunday School workers.

Another attractive feature of the Agricultural College summer work is the Chautauqua week of lectures and concerts to be held in Logan during the week beginning June 12 under the direction of the Logan Commercial Club.

Melancholia is usually due to indigestion; "the blues" are a digestive disorder.

BIG CONVENTION OF SCIENTISTS

San Diego to be Meeting Place
of Pacific Coast Scientists
August 9th to 12th.

EMINENT SCIENTISTS
INCLUDED ON PROGRAM

Will be Convention of Pacific Division
of American Association for
Advancement of Science.

One of the greatest gatherings of scientists ever held on the Pacific Coast is planned for August 9 to 12 at San Diego (immediately after the Summer Assembly in Science which the University of California will hold at the Scripps Institution for Biological Research, at La Jolla, near San Diego, from June 26 to August 5.)

This will be a convention of the Pacific Division of the American Association for the Advancement of Science, which includes in its membership eleven hundred scientists and others interested in scientific affairs and thirteen Pacific Coast scientific societies, many of which are to hold meetings at San Diego in conjunction with the Association. This will be the first annual meeting of the Pacific Division, organized a year ago, when the American Association held a national meeting at the Exposition in San Francisco to commemorate those achievements of science which made possible the Panama Canal—preventive medicine, public sanitation, and modern engineering.

The programme for this great gathering of scientists at the Panama-California Exposition at San Diego, is being arranged by Dr. W. W. Campbell, Director of the Lick Observatory of the University of California, as President of the Pacific Division for the American Association for the Advancement of Science; Dr. D. T. MacDougal, Director of the Desert National Laboratory at Tucson, Arizona, Vice President; and Albert L. Barrows of the University of California, Secretary-Treasurer, and by an executive committee which includes also Professor Edward C. Franklin of Stanford, the chemist; Professor C. Frye of the University of Washington the biologist; E. C. Grunsky of San Francisco, formerly a member of the Panama Canal Commission; Dr. Geo. S. Hale, Director of the Mount Wilson Solar Observatory at Pasadena; Professor Vernon L. Kellogg of Stanford University, the biologist, recently in charge of relief work in the portion of France occupied by Germany; Professor Andrew C. Lawson of the University of California, the geologist, and Professor E. P. Lewis, the physicist, of the University of California.

In recognition of the valuable work of popularization of scientific knowledge which is being done through the scientific exhibits at the Panama-California Exposition, three public addresses of a popular nature will be delivered, upon subjects of general scientific interest, including an address on "What we know about Comets," by Director Campbell of the Lick Observatory, on August 9; and addresses on August 10 and 11 by Dr. Barton W. Everman of San Francisco, Director of the Museum of the California Academy of Sciences; and Dr. F. F. Westbrock, President of the University of British Columbia.

This convention of scientists will be one of the several reasons why California will be a Mecca for those interested in science during the coming summer, for besides the Summer Assembly in Science at the University of California's Scripps Institution for Biological Research, at La Jolla from June 26 to August 5, special opportunities for study of the rich and varied animal and plant life of the California coast will be afforded this summer by the Marine Biological Laboratory of the University of Southern California at Venice; the Summer Session of the Marine Laboratory at Stanford University at Pacific Grove, for six weeks beginning May 22, and the Biological Laboratory of Pomona College, at Laguna Beach.

The Alumni Association of the B. N. S.-B. A. C. have issued neat invitations in the form of a folder for their annual banquet, which will be held this year, Monday, May 29, commencing at 5 o'clock p. m. The invitation folder also contains the menu for the banquet, which is to be served by Mr. Harry Michels, the program of speeches and toasts, the program of events for Commencement week and the names of the officers of the Alumni Association.

To lick a piece of court plaster and put it over a fresh wound is to invite trouble. The saliva often contains pus-forming germs; furthermore, wounds should be kept open to promote free drainage.

Spring medicines always contain laxatives that hurry the unused heavy food out of the body before it has time to ferment, decompose and poison us. A far better plan is to eat only what heavy food the spring season requires.

LOCAL HAPPENINGS.

Plenty of old papers for putting under carpets, etc., cheap at The Record office.

Mrs. Theda Jones and others were out last Sunday from Beaver in the interest of their land.

Cedar City could use another painter and paper hanger or two very nicely during the clean up and paint up campaign.

FOR SALE.—About two dozen folding camp chairs. Just the thing for the summer home or farm house, at 50 cents each. Inquire at Record Office.

Dr. E. F. Green reports that prospects are again favorable for the early development of his coal properties, and for the construction of a branch railroad to this city.

John C. Isbell has been granted a license for conducting a pool hall and has opened up in the lower floor of the telephone building. This is the second pool hall for Cedar City.

A beautiful and much appreciated rain storm has been descending upon this part of the country pretty much all day today, and the ground has received a good soaking.

It looks as if the storm might interfere with the base ball game tomorrow afternoon. If it comes out fine, and the ground is dry enough, however, the game will go on as arranged for.

In proportion to population, we believe Cedar City has more automobiles than any town in the state, and still we are buying them. This ought to be an index to other business conditions here.

E. M. Corry is now the happy owner of a new Paige touring car. One by one we are all coming to it. If the Potash deposits prove good we will all be driving Pierce Arrows, Packards, and Marmons!

Today sees the winding up of the district schools throughout Iron county, and tomorrow the promotion certificates will be distributed to those entitled. The youngsters are, as usual, glad to welcome their summer vacation.

Do not forget the theatrical entertainment at the B. A. C. next week Thursday night. A treat is assured to those having an appreciation of good comedy. The program will consist of three short farces interspersed with high class specialties.

Are you doing your part towards the laudable and necessary clean up by every single, solitary soul doing his or her just share of the work. Let each one here and now make up their mind to become one of the leaders in this regard.

A 300 yard race between a Buick light six touring car and a Ford touring car, from a standing start up the Main street grade was pulled off last Saturday, the Buick winning the bet. The affair was conducted by John H. Fife, local agent for the Ford, and G. R. Parry, agent for the Buick.

Dr. H. H. Wilkinson came up from Hurricane Monday, bringing Miss Verma Isom, who was operated on for appendicitis Tuesday by Drs. Leonard and Wilkinson. At this writing the patient is progressing very favorably. Dr. Wilkinson returned to Hurricane Tuesday evening.

Mr. G. R. Parry, local agent for Buick cars, reports the sale of 13 Buicks in his territory since he took over the agency a little more than two months ago, besides a National and one or two of other makes. Mr. Parry is certainly some salesman, and has a good car to handle in the Buick.

The beginning of the clean-up and paint-up campaign has been extended for one week longer, in order to give all a chance to get their premises in order for the visit of the inspectors. The committee strongly urges that everyone co-operate in the movement and accomplish as much of the good work as possible.

Mr. and Mrs. John T. Bulloch are the happy recipients of a nice baby boy, born Wednesday evening. Dr. Leonard reports all concerned doing nicely. The doctor also reports the birth of a baby boy to Mrs. Luella Worthington of Lund, yesterday morning. Mr. Worthington is an employee of the railroad company.

S. A. Halterman of Parowan passed through Sunday en route to Salt Lake City to bring one of the long-looked-for Hudson Super Six cars. He had just received a wire from the state agency that he could obtain one. He expects to have it on exhibition in Cedar City the latter part of the present week.

City watermaster and supervisor S. F. Leigh is entitled to a great deal of credit for the present condition of the city ditches, which are in better shape than at any time in the past history of the town. He has made a neat, straight job of them, and one which is a credit to the city, as well as a good boost towards a clean town.

A. T. Jones, manager of the local branch of the Utah-Idaho Motor company, came in the end of the week with a new five-passenger Paige touring car for E. M. Corry, assistant cashier of the Bank of Southern Utah. Mr. Jones reports having taken orders for six more of this model of the Paige since this one was placed on exhibition here. Apparently it is going to keep him busy to get the cars fast enough to supply the demand.
